Office Action Summary	Application No. 10/823,336	Applicant(s) GASCOIN ET AL.	
	Examiner David B. Jones	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims appear to be a direct translation from a foreign document and as such contain limitations that are indefinite and unclear. All the claims should be reviewed and amended into proper claim form commensurate with US practice. In claim 1, line 12/13, the limitation, "suitable for taking up two states" is unclear and indefinite. On line 15 of claim 1, "the state of each actuator assembly" lacks antecedent basis. Further on line 16 of claim 1, the limitation, "adjacent clamps" lacks clear antecedent basis. Finally in claim 1, line 19/20, "the state of each actuator assembly" lacks clear antecedent basis. In claim 2, it is unclear as to the nature of "intermediate pieces" and how they interrelate to the other elements of the combination. On line 2 from the bottom of claim 2, the limitation of a "transmission means" is indefinite in that it is unclear whether the applicant is referring to the "transmission means" of claim 1, line 14 or yet another "transmission means". In claim 3, line 3, "the two ends" lacks clear antecedent basis. In claim 4, line 2, "2n second levers" is an indefinite limitation and is not understood. Further in claim 4, "the end of a first lever" and "the second ends of the second levers" lack antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Harrington et al.

'611. Harrington et al. teaches the claimed invention (See Figs. 1 and 2) with a plurality of actuator assemblies with an example of an actuator assembly generally at 200 in Fig. 2, the actuator assembly having two clamps 44/46, a plurality of transmission means being at 300 (Fig. 2) in each of the plurality of actuator assemblies, and the means for controlling each of the assemblies being at 340 in Fig. 2.

3. Claims 2-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. JONES whose telephone number is (571) 272-4518.

Any inquiry of a general nature or relating to the status of this application should be directed to telephone number is (571) 272-3700.

In the event that the Applicant(s) wishes to communicate via Fax, the current central Fax number for the patent office is (571) 273-8300
